THE REDCLIFF REVIEW, THURSDAY, OCT. 23rd, 1930

Number 12

Community Judges Amazed at Progress

Amazed at the achievements of the settlers, and at the general community progress indicated in many in many of the European settlements in Manitoba, the three provincial judges in the Canadian National Railways community progress competitions, Dr. John Mackay, of Manitoba College, Mrs. David Watt, of the Women's Institutes, and Brother Joseph Fink, of Provencher School, paid high tribute to these communities on the completion of their judging party visit this week. The judging party visited five or six of the communities, and had their eyes opened with respect to what these settlements, which were chiefly Ukrainian, had accomplished throughout the three or more decades in which they have been part of rural Manitoba life.

Just which three communities will be the winners of the prize will not be made known for some weeks, but it is safe to say that nothing in many years has roused the interests of these communities, or encouraged them more in their striving towards ideal conditions, than these competitions, in which the judges are taking account of every phase of community progress and development.

Announcement of the winners will be made some time in December, the prize money in each case to be devoted to some form of community development. A total of \$1,750.00 is being offered in each of the three provinces by the Canadian National Railways there being forty communities in the three provinces entered.

Local Greenhouse is Registered in Province

Alberta Headquarters of Company is in Redcliff.

Under the heading: "Certificates of Registration" the Alberta Gazette announces the registration of the "Dominion Produce Co. Limited" under the province. The registration states that:

The head office of the company without the Province is situated at Roseland, B. C.; the head office of the company in the Province of Alberta is situated at Redcliff; the attorney of the company is Irving J. Tremblay, Secretary-Treasurer, Redcliff; the authorized capital of the company is \$50,000; the paid-up capital of the company is \$33,870; and the company is limited (capital employed in province, \$73,870).

On Tuesday afternoon, Oct. 21, eighteen mothers and twenty-four children members of the Credit Hill Department met in Gordon Memorial Church, under the governorship of Mrs. J. M. Stratton. After opening ceremonies, a guessing contest occupied the mothers—five of whom gave complete guesses. The prize was drawn for and went to Mrs. H. G. Sheasby. The children were entertained with toys and games. Refreshments were served by some of the ladies, and Mr. Pew addressed the mothers.

J. H. McKennie, of the Dominion Glass Plant spent a few days in Winnipeg this week on business for the company.

To Apport Board For Livestock Work

Aim To Distribute Available Stock in Province.

Creation of an Agricultural Development Board which will have as its aim the co-ordination of effort between those desirous of purchasing various types of livestock, and financial institutions, and organized co-operative groups, and, through meetings with these, to further the distribution of available livestock throughout the province, was announced by Hon. George Headley, Minister of Agriculture, at a banquet tendered visiting cattle-men by the Calgary Livestock Exchange, at the Palliser Hotel, Monday evening.

Mr. Headley made it plain the sole reason for the creation of this board was a desire on the part of the government to assist in the stabilizing of the livestock industry, and the prevention of false standards in a time of stress. The basis of livestock was in breeding, not feeding, the minister said and the present endeavor was toward the preservation of female stock from slaughter.

SEVEN CHILDREN START ON JOURNEY TO SCOTLAND

Because their mother died, seven young children from Crook River, Sask., ranging from two to thirteen years, are on their way to Scotland. They are travelling unaccompanied, all the way to Edinburgh, where they will take them into their homes.

The rail trip was made over the Canadian National Railways. Last Friday, they sailed on the Canarder "Athenia" from Montreal.

T. W. Wilson, the father of this family, has been a resident in Canada for the past 15 years. Mrs. Wilson died last winter.

As the result of a gas explosion in the cellar of R. R. Schneider or Medicine Hat, yesterday, Mr. Schneider was badly burned and the house badly damaged. The roof and walls were blown out and all the windows broken. A tank in a pipe in the cellar is supposed to have caused the explosion when Mr. Schneider lit a match.

Govt. To Help Get Meeting is Called For Skating Rink

Will Be Held Next Wednesday in the Legion Hall.

Officials of the Skating Rink are anxious to get away to an early start this year with their preparations for getting everything in shape for opening up as soon as weather conditions will warrant.

With this object in view a meeting has been called for next Wednesday evening to be held in the reading room and to complete the arrangements for the skating rink.

As this is a community undertaking much the same as the swimming pool, it is hoped that all who are interested in furnishing good wholesome sport for the young people of the town will make it a point to attend this meeting and give their hearty cooperation to the movement.

It is absolutely necessary to make the venture a success. Let us all put our shoulder to the wheel and put the Skating Rink over with a bang this year.

Miss Campeau returned home last week end after spending a few weeks visiting friends at the Pacific Coast.

Miss Dacre, of Calgary spent last week end in town visiting her parents. Her brother, Foster returned to Calgary with her on Monday.

Mrs. Stone received word Monday afternoon of the sudden death of her sister's only child Terence Hagerman, a young lad 18 years of age who died at his home in Winnipeg. Terence was born in Redcliff at the home of Mr. and Mrs. Stone. Deceased was a robust lad until a week ago a great athlete, clean at school and an accomplished musician.

Dr. Wray has engaged an office over the Drug Store and is located in Redcliff on November the first where he will practise dentistry. Dr. Wray practised here during earlier days of the town and left several years ago. But owing to the prosperous condition of the town now he has decided to re-establish himself here once more. This will be good news to the Redcliff people as a dentist is a welcome addition to the business and professional men of the town.

Mr. R. S. Hodge who has been holding at the road for the past two months returned home last Monday.

R. C. Schneider, a seven year old boy of the Norton district just east of Medicine Hat, won the car at the Rotary Carnival in the Hat last Saturday.

Thanksgiving Day Set for Nov. 10th

The following Proclamation appears in the last Alberta Gazette:

Whereas it hath pleased the Almighty God, in His great goodness to vouchsafe this year to our Dominion of Canada a bountiful harvest; and other blessings; We, therefore, considering that these blessings enjoyed by Our people throughout the said Dominion do call for a solemn acknowledgment, have thought fit, by and with the advice of Our Privy Council for Canada, to appoint and We do appoint MONDAY, the tenth day of November, 1930 (Armistice Day) as the day of General Thanksgiving to Almighty God for the bountiful harvest and other blessings with which Canada has been favored this year, and We enjoin all Our loving subjects throughout Canada to observe the said day as a day of General Thanksgiving.

As soon as the excitement was over and it was seen that no one was seriously hurt work of cleaning up the debris was commenced and plans are now under way for repairing the damaged furnace.

It is presumed that gas escaping into the furnace before the torch was applied was the cause of the explosion.

Archie Rutherford, eldest son of Mr. and Mrs. John Rutherford of this town, was married last Wednesday in Medicine Hat to Miss Jean Velsa Street, of that City. The Review extends congratulations to its former employee and his bride.

There are at present in the Province of Quebec 36,000 miles of rural roads, of which 516 miles are first-class roads, 1,512 miles are second-class and 1,512 miles are third-class. Over 11,000 miles of roads in the province or about 61 per cent are permanently improved and surfaced with either concrete, macadam or gravel.

Thoroughly representative of Canadian business across the breadth of the Dominion from Vancouver, members of the Canadian Chamber of Commerce held the latter city October 16 on the Empress of Russia for Japan and China. The party included financiers, editors, manufacturers, professional and business men of national reputation. It was such an important delegation to leave Canada for the Far East.

Mr. Benjamin Robertson, member of the Council for India, who has just completed a seven-week tour of Canada from Atlantic to Pacific, said he had been greatly impressed by the people and the possibilities for economic development of the Dominion. He was much gratified to find throughout Canada a feeling of loyalty to the Empire and a strong recognition of the importance of the Dominion.

Mr. Robertson, who came to Montreal on the Empress, August 21, left Saint John for New York to return to Montreal October 8.

When the new steamer Princess Helen was put into service on the day of Friday, August 27, she has been on her run for slightly more than 26 per cent. In the general traffic on the route between Saint John and Saint John, the Princess Helen is the only Canadian Pacific Railway vessel.

"Look-a-day-lie," an emotional young person whose character is described by surprise, made her first radio appearance on a recent Monday evening in the programme from "Melody Mike's Music Show," new Canadian Pacific Railway radio feature. This programme is broadcast over the C.P.R.'s transcontinental network of Canadian stations linked together by the broadcast transmission system of the railway, including its stations in western Canada. Many musical songs and choruses, including old-time favorites and popular song bits, are incorporated in the programme from Melody Mike's radio empire.

Addressing the Teachers' Convention held at Montreal recently, Mr. G. G. O'Mannany, director of the department of development, Canadian Pacific Railway, added a wealth of data and figures to support his contention that one thing could stop the Dominion's future progress and growth.

Furnace at Glass Factory Blows Up

Gas Explosion When Preparing to Light Furnace.

While in the act of starting a new furnace at the glass plant yesterday an explosion occurred which completely destroyed the furnace and endangered the lives of a score of men who were in the vicinity of the furnace at the time. The wreckage left by the explosion makes it look like a miracle that no lives were lost. Although several were badly scared and a few received slight bruises, L. Arnold was the only badly hurt and we are assured his wounds are not serious.

The furnace was only recently rebuilt and plans were under way to have the machine connected with it put in operation when the explosion happened. Bricks were scattered in all directions and the force of the explosion blew out all the windows in that part of the plant.

As soon as the excitement was over and it was seen that no one was seriously hurt work of cleaning up the debris was commenced and plans are now under way for repairing the damaged furnace.

It is presumed that gas escaping into the furnace before the torch was applied was the cause of the explosion.

What Is Right With Canada?

A moderate optimist, we are told, is one who sees both the good and the bad, the pleasing and the displeasing, the bright and the dark, the encouraging and the discouraging, but prefers to think and talk about the brighter and better things.

At the present time we have more than a sufficient of pessimists, crass-baggers, disseminators of blue ruin gossip. We also have a few incorrigible optimists who shut their eyes and ears to the actual facts of any situation, and cry "All is well."

What Canada and the world needs today are more moderate optimists, men and women who, looking at both sides of the picture, refuse to be depressed by the darker colors and shadows and find encouragement and great promise in the brighter colors and the rays of sunshine breaking through the clouds.

Major Yeats-Brown, an Englishman, is the type of moderate optimist whose number should be multiplied. As an offset to the many things that have been said in answer to the query: "What is Wrong with England?" he advances the question: "What is Right with England?" and proceeds to answer his own question most entertainingly in the London Spectator.

Would it not be advisable for us in this country to also reverse the usual question we hear so often asked these days, and, rather, make answer to the query: "What is Right with Canada?" We may well do so, because there are so many things that are right with this Dominion, so many more right things than there are wrong things, that we are doubly foolish to ignore them and dwell upon the smaller ills.

Looking around Canada we can discover a multitude of good things, the very best things. We find, for example, one of the most healthy, robust people in the world, possessing an abounding vitality and charged with initiative and energy. And of all the blessings which can be bestowed upon a nation or individual, what other one blessing, or group of blessings, surpasses that of health? Possessing health all things are possible; lacking it, all the wealth of the world is valueless to bring joy and happiness into one's life.

Looking at other countries, we find many of them filled with hatreds, with strife uppermost in the minds of the people, their thoughts and energies devoted to preparation for possible warfare. In Canada, on the other hand, we have a land occupied by a peace-loving people with a positive and growing hatred of war, and with no preparations for war, but devoting their thoughts and energies to the arts and advancements of peace. No other country in the world is so "right" on the subject of peace and disarmament as is Canada.

Grouped with health and a sane viewpoint of man's relations to man we can place the moral and intellectual outlook of a nation. Looking over our broad Dominion we find a deep-rooted moral fibre, stronger and sturdier than in most lands, with an abiding respect for law and order which no other country can excel, and which far surpasses that entertained by the people of any other country in either North or South America. We find Canada a land of schools and universities, a land in the very front rank of all movements for social betterment, a land the very foundations of which are sound, strong and stable.

Generally speaking, too, Canadian institutions of all kinds, whatever their faults, are strong and sound, constituting a bulwark in defence of the people. A bank failure in Canada is a rare thing; our railways are progressive and efficient, fitting their programmes well into the life and needs of the Dominion. We are not—and never can be—immune from the vicissitudes and effects of world conditions and happenings, but, even so, we have it within ourselves, in our institutions and resources, to withstand the evil effects of world matters beyond our own direct control, and to rally from those had effects more rapidly than any other land. At this present time, Canada, notwithstanding its difficulties and business depression, is infinitely better off and stronger than most countries, and is suffering from less unemployment, proportionate to its population, than the United States.

Let us, therefore, dwell a little more on "What is Right?" and the effect of doing so will unquestionably be to lessen interest in the more depressing question "What is Wrong?" Isn't the search for right things most likely to expand and thus diminish keenness in the search for wrong things? And isn't it just possible that because of right things will grow and be properly recognized will presently the wrong things be forgotten, or at least given their proper relative place in the general scheme? Let us join the quest of the moderate optimist.

Western Orchards

G. F. Chipman, editor of the *Courier* of Gr. Falls, predicts that the near future will see orchards of standard eating apples in all parts of the Prairies where wheat is now grown successfully.

Darrell: "Gee, I'm in an awful hole."
Bill: "What's the matter?"
Darrell: "I spelled 'professor' with two 'r's' and don't know which one to cross out."

An investigation of the average life-span of household furnishings shows that a rug lasts nine years, a living room chair usually survives 12 years, and a dining room table 15.

Ontario Gold Production

Gold production in the province of Ontario for the first eight months of 1924 was valued at \$2,287,250, an increase of over \$1,500,000 in value compared with corresponding period in 1923.

Lawyer: "I must know the whole truth before I can successfully defend you. Have you told me the whole truth?"
Prisoner: "Except where I hid the money, I was told me."

Bookkeeper—Do you want a book of fiction, or a serious work?
Madam—I really don't care. But it must be bound in all-green, so that it will match the wallpaper.

Only a Memory

American Farmer Sees His Holdings Divide Under Succession

Senator Thaddeus H. Caraway, of Arkansas, in a speech before the state Democratic convention, described himself as an "ex-farmer."

"When Woodrow Wilson was president I owned a farm," he said. "After Harding was in office, I had only an equity. Then came Coolidge and all that was left of my farm was an echo. Now that we have an era of Hoover prosperity, my farm holdings consist of a memory."

Temperature tests made in the region of a forest show "at the draft and heat from a flame caused a difference of ten degrees in temperature at some distance ahead of the advancing fire."

Minors' Lament addressed lost foot.

IRISH POET IN NEW YORK

George Russell, Irish poet, essayist and economist, has arrived in New York with what he believes is a system of agricultural co-operation that will bring economic relief to the farmer.

The distinguished visitor, who is well known under the pen name of "AE," plans to visit every state in the union during his six months' visit.

To Study Canadian Methods

Seed Potatoes From Maritime Males Hit With American Growers

The humble spud, which is produced in such quantities in the maritime provinces, has become almost a trade mark of Canada in some American markets, and it rose to real prominence during a visit of 100 members of the Pennsylvania Potato Growers' Association to New Brunswick and Prince Edward Island.

These two areas produce the finest seed potatoes on the continent, and the purpose of the visit by the delegation was to study the method under which these superior spuds are raised. The provincial departments of agriculture met the visitors and showed them all that was to be seen.

CONSTITUTED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and stomach empty.

Do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative, are safe, effective and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Refreshing Treat

Church Supper Gives People Opportunity For Sociability

The season for the church supper and the festival is here. These delightful events crowd the late summer and early autumn evenings. In this day and generation of so-called high-priced entertainments when we tend to depend so largely on manufactured enjoyment it is indeed a refreshing treat to attend the rural church supper or festival. At these events there is to be found wholesomeness and a plenty of food and association for greater value than the price paid for the ticket. These affairs are conducted for profit of course, but in a broader profit than monetary gain alone.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders can restore the most delicate babies to health. It is nothing to neglect for the health of a worm-eaten infant.

Fire Kept Burning

Century and Half North Carolina Family Has Not Let It Go Out

Along about the time the Declaration of Independence was being signed a stalwart son of Saxony came to the mountains of Saluda, N.C., to build a cabin for his family. A fire kindled on the newly-laid hearth has never gone out.

William Morris, who doesn't know how old he is, lives alone in the warped log hut, and tends the fire his grandfather started more than 150 years ago. He is the last man of his family.

An Old Without Alcohol—Some ailments and many medicines have alcohol as a prominent ingredient. A judicious mingling of the essential oils composed Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

An Artist Without Arms

Henry Wiegman, a student artist of Chicago, a suburb of Chicago, was born without arms. But he is one of the promising students of an art school here. Wiegman holds the brush between his teeth and manipulates it with his feet. He intends to make his living by commercial illustration or in his own gift shop. His ambition to paint dates from the time he learned to write by the same method. He is twenty-three now.

Athletes recommend Miner's Liniment.

Conjuring Creek

Conjuring Creek, the curious name of a northern Saskatchewan river, was first suggested by that of Wizard Lake from which it flows. The Creek means is "Pangloss."

Retalia is to have a library of historic naval photographs.

Singing is a most valuable exercise for the lungs.

Impatient For Disarmament

League Of Nations, Is Called Upon To Take Quick Action

A vehement and sometimes impatient demonstration, urging the hastening of the League of Nations' disarmament programme and early conclusion of the peace conference, for reduction and limitation of armaments, was witnessed in the League assembly's disarmament committee at Geneva recently.

From this latter there arose a promise of J. J. Louche, chairman of the preparatory disarmament committee, that the commission would meet November 3 and fervidly seek to finish its task of clearing the way completely for a congress of all nations to construct a scheme of general disarmament. Voices from countries were neutral during the World War, joined those from states which were disarmed by the war in its demand that the League should get on quickly with its long delayed purpose of inducing nations to lay aside their arms.

German Property Sequestered

Conversations Between Officials Of Canadian and German Governments To Be Held

German property seized in Canada during the war will be the subject of conversations between officials of the German government and Hon. H. Cahan, secretary of state. Accompanied by Thomas Mulvey, under-secretary of state, Mr. Cahan will sail from New York. Discussions will take place in Berlin.

The large amount of property of German nationals sequestered by the Canadian government during the war, some \$600,000 remains unliquidated. In January, Canada agreed that the unliquidated property consists chiefly of land and securities that it has been found difficult to market. There still will remain in the hands of the Dominion government more than enough to settle all claims by Canadian citizens for reparations as a result of enemy action in war-time.

DR. J. J. LOUCHE'S VAPOR

OVER 25 YEARS' USE

Impatient For Disarmament

League Of Nations, Is Called Upon To Take Quick Action

A vehement and sometimes impatient demonstration, urging the hastening of the League of Nations' disarmament programme and early conclusion of the peace conference, for reduction and limitation of armaments, was witnessed in the League assembly's disarmament committee at Geneva recently.

From this latter there arose a promise of J. J. Louche, chairman of the preparatory disarmament committee, that the commission would meet November 3 and fervidly seek to finish its task of clearing the way completely for a congress of all nations to construct a scheme of general disarmament. Voices from countries were neutral during the World War, joined those from states which were disarmed by the war in its demand that the League should get on quickly with its long delayed purpose of inducing nations to lay aside their arms.

German Property Sequestered

Conversations Between Officials Of Canadian and German Governments To Be Held

German property seized in Canada during the war will be the subject of conversations between officials of the German government and Hon. H. Cahan, secretary of state. Accompanied by Thomas Mulvey, under-secretary of state, Mr. Cahan will sail from New York. Discussions will take place in Berlin.

The large amount of property of German nationals sequestered by the Canadian government during the war, some \$600,000 remains unliquidated. In January, Canada agreed that the unliquidated property consists chiefly of land and securities that it has been found difficult to market. There still will remain in the hands of the Dominion government more than enough to settle all claims by Canadian citizens for reparations as a result of enemy action in war-time.

Century and Half North Carolina Family Has Not Let It Go Out

Along about the time the Declaration of Independence was being signed a stalwart son of Saxony came to the mountains of Saluda, N.C., to build a cabin for his family. A fire kindled on the newly-laid hearth has never gone out.

William Morris, who doesn't know how old he is, lives alone in the warped log hut, and tends the fire his grandfather started more than 150 years ago. He is the last man of his family.

An Old Without Alcohol—Some ailments and many medicines have alcohol as a prominent ingredient. A judicious mingling of the essential oils composed Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Livestock Is Shown To Be A Prime Factor In Economic Development Of The West

A popular idea is that revenue in the Canadian prairie provinces is derived almost wholly from grain. A second idea is that the growth of these provinces has been due to the steady increase in grain production at the expense of livestock and that down drastically the number of head of livestock between the Great Lakes and the Rocky Mountains. Both ideas need considerable revision.

The rapid settlement of the Prairie Provinces made possible by grain growing has been accompanied by an increase in livestock that has more than compensated for the reduction in ranches, so that as numbers are concerned, self-sustaining farming means the raising of livestock, and the change in the West in this respect within the past decade or so has been remarkable. Today, through the livestock industry in Manitoba, Saskatchewan, and Alberta has only touched the edge of possibilities, the number of head of cattle, sheep and swine on farms is an important percentage of the whole in the Dominion. The fact has great value economically, for it tends to spread agricultural wealth more evenly over the seasons than is possible with grain raising only.

The four western provinces have more sheep than three times as many cattle, more than four times as many swine and nearly eight times as many horses as there were in the Dominion in 1910. Comparative figures for the year 1910, when complete records were first gathered, and 1929, are as follows:

Year	Cattle	Sheep	Swine
1910	1,066,627	215,996	241,794
1929	3,554,040	1,113,143	1,728,605

It is interesting to examine the figures representing the livestock production of Western Canada for the last eight years. In arriving at the total it is difficult to gauge the number of head of livestock kept on farms for home use and by local butchers and at small, unvisited grazing plants. The Dominion Bureau of Statistics finds that in the case of cattle indicated, slaughtering runs about fifty per cent. and the year estimated total kill in Canada, hogs about forty per cent., and sheep about ten per cent. By making the necessary adjustments, therefore, on the reported slaughtering in the Western provinces a fairly close estimate of the local or unvisited killings may be made.

Total figures representing some seven and one-half million cattle, over eighteen million hogs and about two and three-quarter million sheep look to the credit of Western Canada at first glance. When it is found by further figuring that for the same period 15,360,097 cattle, 47,481,905 hogs and 10,905,429 sheep and lambs are the estimated total killings in the whole Dominion of Canada, the slightly different aspect of the picture is presented. Continuing with the comparison it is found that in the northern Canada produced roughly 48 per cent. of the total cattle, 88 per cent. of the swine and 25 per cent. of the sheep and lambs.

In this a fair share of the total, or could Western Canada, everything considered, have been expected to produce a greater percentage of the total? If only livestock production is considered in terms of acres of land under cultivation and suitable for cattle production one might form the opinion that the West should be marketing two-thirds or three-quarters of the Canadian total, but when the hundreds of millions of pounds of grain that Western Canada ships annually are considered the conclusion is reached that while there is room for great ultimate expansion of the cattle industry there, the West is possibly for the moment carrying a fair share.

Swine production figures, however, are not so easily disposed of in that manner. The fact that so much

grain is being produced on the prairie would lead one to believe that the West should be the source of the meat supply for the Dominion, for swine production goes hand in hand with grain production. It is in fact that swine can be produced more cheaply than at the mountain head of the grain supplies. Yet Western Canada, with very small grain fields, although having a certain advantage in the matter of dry-weather crops, turns out nearly two hogs for every one that comes from the West.

The following table, showing number of bushels of wheat and all other potential feed grains produced for every hog carried in the various provinces respectively, indicates that hog production in the older provinces has become more or less stabilized in relation to their grain supplies, but it also points out the possibilities open to swine men of the West.

Province	1910-11	1916-17	1917-18	1918-19
Manitoba	97	118	131	102
Quebec	70	81	85	72
British Columbia	109	110	110	100

Province	1910-11	1916-17	1917-18	1918-19
Manitoba	680	488	499	394

Swine 550 571 654 694
Wheat 384 281 230 334
Other feed grains 281 230 334
Total 664 769 924 1028
The fact that hog production in the older provinces has become more or less stabilized in relation to grain supplies it would appear that not only is there plenty of grain available to increase hog production in the West but great advances in swine marketing might reasonably be expected in the not distant future from Saskatchewan, Manitoba and Alberta. The difficulties attending the marketing of the immense quantities of hog grade wheat and feed grains of the 1929 crop, and the apparently more serious difficulties attending the marketing of the short high grade wheat of the 1929 crop, also seem to favor the grain crop, as also the feed grain crop, and the fact that the Western farmer is not so much concerned with these feeds at the greater relative returns obtainable through hog production.

Some agitation was caused by the fact that last year Canada's net imports of lamb and mutton were over three- and three-quarter million pounds. Yet the per capita consumption of lamb and mutton in this country is only about 6.5 lbs. Does not this point out an opportunity for substantial increase in production of these meats, first, to meet the competition of the imported product and second, in view of making lamb a more important item in the average family menu? Western Canada's net imports of lamb and mutton in 1929, in this respect, as sheep are probably the best livestock to assist in the reduction of the net imports of lamb and mutton and dirty grain farms.

Canada should be able to feed all her sheep and cattle on Canadian grown livestock products, and should be able to produce them at a lower cost than any other country in the world. We have almost everything necessary to insure success in such competition; the one essential thing lacking at present seems to be a definite program and plan of production.

The Method In Ireland

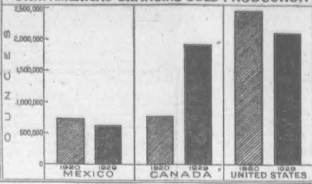

People Resort To Bricks When Hunters Disturb Them

Tired of the "ceaseless banging" of the guns of game hunters, people in the vicinity of a lake in Cork, Ireland, restored peace by use of stones, bricks and rods. Since the opening of the hunting season there was a fusillade at dawn and dusk. As the district is not regarded as a shooting range, foxes who were killed could not be touched by law. City officials told the protestants that they were powerless, and the City Corporation met and gave the same reply. Alderman Daly moved to request the Minister of Justice to issue an order closing the lake as a sanctuary. But the peace-seekers could not wait that long. When the sportsmen next appeared, men, women and children met them with a fusillade of missiles. Sportsmen and dogs beat a hasty retreat, some men dropping their guns as they ran.

Owned Valuable Cods

After walking around for several months with a \$20 gold piece minted in 1847 in his pocket, Clark Le Bon, of Toledo, decided he'd look up the coin in a catalogue and see how much it was worth. Yet could he not knock him down with a feather when he read that because of the peculiar thickness of the design it was worth \$2,500.

NORTH AMERICA'S CHANGING GOLD PRODUCTION

North America is, next to Africa, the chief gold-producing continent, usually contributing about one-quarter of the world's annual gold output. Within the past decade the North American production of the yellow metal has rather more than held its own, but this showing has been due entirely to the fact that Canada's rising output has been sufficient to offset the decline in the United States and Mexico. Ten years ago the gold output of the United States was three times as great as that of the Dominion. Today the two countries are almost on a par in that regard.

Sheepmen's Opportunity

Demand For Mutton and Lamb Is Steadily On the Increase

Reporters of the Dominion Bureau of Statistics are of the opinion that sheep-raising countries is that a reduction in the flocks is taking place. The Bureau of Agricultural Production in the United States believes the decrease will continue for the next two or three years. This should suggest to Canadian sheepmen a policy of "staying in." Our total sheep number is insignificant compared with the estimated total of about 70 million for the whole world. Still more to the point, it is actually too small for a country of ten million population in which the demand for lamb and mutton is steadily going up. The per capita consumption of these meats is still a long way from being equal to that of some other countries and the indications are that the demand for demand for good quality Canadian lambs for a long period.

The Dominion Bureau of Statistics is of the opinion that the production of going out of sheep too strongly is hinted at by the Bureau when it states: "The individual producer is advised to consider carefully his feed supplies and the long-time outlook for the sheep industry, in making his plans for next year. Where feed supplies are available he may find that present conditions offer a good opportunity for improving the quality of his breeding flock."

Predicts Growth Of Dairying

Manitoba Dairy Commissioner Notes Steady Increase Of Industry In the West

L. A. Gibson, dairy commissioner for Manitoba, states that he never expects a better show of better than that exhibited by Manitoba at the Toronto Exhibition. He noted a steady growth of interest in the dairy industry of the West, and pointed out that in Manitoba alone the sale of better, cheese, cream, milk and other dairy products amounted now to \$15,000,000 a year. He believed that the next few years would witness an even greater growth in dairy production.

World's Grain Show

Many Countries Have Signaled Their Intention Of Being Represented

Belgium has officially accepted the invitation to take part in the 15th World Grain Exhibition and Conference at Regina, from July 25th to August 6th, 1932. Some little time ago official invitations were sent from the Dominion Government to all countries inviting them to participate and a number of these have already signified their desire to do so. They include Peru, Yugoslavia, Guatemala, New Zealand, Poland, Czechoslovakia, The Netherlands and Belgium.

The first sandwich from an on-rotated house of 5,000 people at a Regatta, was sold for \$2.75.

New Variety Of Barley

Is Practically Barless and Gives Good Yield Per Acre

There should be more barley grown on Canadian farms, especially dairy farms. Tests made in several provinces have shown again and again that barley, on the average, produces more pounds of feed per acre than does oats, and that the feed is worth more per pound. And yet the crop is not commonly grown. The reason is not far to seek. Few people care to wage war with barley beards. They would rather take the smaller return per acre from oats than undergo the discomfort of threshing barley and handling the straw through the winter. This battle with barley beards is a long and longer an argument against barley.

Several stations announce new varieties of barley that are almost barless or have short awns. One of these new barless, developed in Canada, is called "Barless," was tested by the O.A.C. No. 21, the most popular variety in Canada. The new smooth awned variety gave an average yield of 39.27 bushels per acre as compared with 35.17 for the Ontario variety. When it is considered that barley fits as well into the cropping system as does oats and that it is a better nurse crop for corn and clover the arguments for a larger use of the crop would seem to be complete.

Reclamation Scheme

Proposed To Reclaim 700,000 Acres In Carrot River District

Formation of an organization similar to the On-to-the-Bay Association to advance the proposed reclamation scheme for the Carrot River triangle was urged by H. P. Bickle, prominent northern, in an address before the local Rotary Club at The Pas. Quoting Federal Government and other reports, Mr. Bickle outlined the various schemes proposed to turn the triangle into a great farming country. The triangle lies southwest of The Pas and north of its area is in Saskatchewan. It consists of about 1,680 square miles, or approximately 100,000 acres. Mr. Bickle pointed out that Premier Anderson, of Saskatchewan, had promised to give the matter consideration after that province had assumed control of its natural resources. However, he asserted, an active association is needed in northern Manitoba to keep the project alive.

Manager: "You're late today, Miss Brown."

Typist: "Yes, sir; I fell down stairs."

Manager: "Well, that didn't take long, did it?"

Certain kinds of water plants are deadly foes of breeding mosquitoes, and one species of waterweed, the bladderwort, actually eats and digests the wigglers.

GERMAN BATTLESHIP "HESSON" FIRING A BROADSIDE

Veteran Canadian Explorer Returns To Atlantic With Relics Of Franklin Expedition

Satisfied that all the information which it is humanly possible to discover regarding the fate of the Sir John Franklin party, which perished among the Arctic islands off the mainland of Canada 38 years ago, has been gleaned, Major L. T. Burwash, veteran explorer, returned to Ottawa with a number of relics.

His discovery is an abandoned camp on King William Island, between Victory Point and Lady Jane Franklin Point, added little to what was already known, beyond definitely establishing the locale of at least one staying place in the long trek which appears to have ended hundreds of miles south, on the Canadian mainland, near the mouth of the Fish River.

The fragment of a canvas tent, circular in shape, and leaning to the southeast, which this portion had been from to the ground while those occupying it had torn away the remains of the pieces of naval broadcloth, some inch-thick rope, and the rusted blade of a knife connected with Burwash's expedition, encountered two graves on King William Island, but from these nothing could be gathered. Of the grave of Sir John Franklin himself, no trace was found.

In spite of the 30-odd years that have elapsed since the two ships " Erebus " and " Terror ", set out in an attempt to discover the North West Passage, a certain fascination continues to surround the fate of their crews. For 70 years a veil of silence has shrouded them and only one small scrap of paper has ever been discovered relating to the expedition.

One of the reports of the expedition was made by Sir John Franklin, who was the first to see the message found on King William Island by the search expedition, Captain McClintock, in 1857. The message, signed by Sir John Franklin, announced how the two ships had wintered at Beechey Island in 1846, and that all was well, but marginal notes on the paper written by another hand at a later date, contained information that Sir John Franklin had died in June 1847. The notes gave the strength of the party as 120 and they proclaimed the intention to essay an overland journey from King William Island to the Canadian mainland at Back's Fish River.

Raise More Geese

Good Returns Obtained On A Very Small Investment

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the goose, providing those two great essentials for successful geese raising—free range and an abundance of green food. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labor. Geese command a good price on the Christmas market and the demand is always greater than the supply.

Finds Five Daughters Expensive

Feeling guilty before the city magistrate of Mysore, India, to the theft of jewels from the Prasanna Krishnaiah Temple, the high priest testified that his salary was only \$7.45 a month. He added that he had been "cursed" by five daughters, and as their husbands were not able to keep them, he was compelled to maintain their families as well as his own.

Somebody has been asking, "What becomes of pins and needles?" The answer is that they disappear after a brisk rubbing of the affected part.

That this trek was attempted is clear from Eskimo tradition. In 1846, Dr. John Pies of the Hudson's Bay Company, surveying the coast-line in that neighborhood, encountered natives who were then using tobacco and other articles which bore the mark of the Franklin expedition. They informed him that years before groups of white men had been seen straggling across the ice to the mainland, "dying as they walked." Verification of the Eskimo tradition was secured at Starvation Cove, where later expeditions located about 40 graves.

The purpose of Major Burwash's fight to King William Island was, in part, to verify, if possible, the story of an American mining engineer, named Jennie, who, many years ago, organized a report concerning the Franklin party, which would, if correct, have thrown new light on their fate. This story, in document form, was bought by the Department of the Interior, from T. W. Jackson, of Vancouver, B.C. In his report to the minister, Major Burwash definitely established that the Jennie story is without foundation.

With two companions, Pilot Gilbert, of the Western Canada Airways, and Richard Finlay, of the Department of the Interior, Major Burwash flew from Bernard Harbor, northwest of the mouth of the Coppermine River, to Boothia Peninsula—the magnetic pole—and thence to King William Island. Landing in a fresh water lake some distance inland, he prospected his search before reaching the mouth of the Slave Lake, Frank Point. Having made his discoveries, he returned by air to the mouth of the Slave Lake, where he was met by Mr. Murray, B.C. In his report to the minister, Major Burwash definitely established that the Jennie story is without foundation.

Over 2,000 photographs were taken by Mr. Finlay during the flight. These will be of great value to topographers in correcting many inaccuracies regarding the coast-line of the mouth of the Slave Lake, Frank Point, and the Mackenzie River. Having made his discoveries, he returned by air to the mouth of the Slave Lake, where he was met by Mr. Murray, B.C. In his report to the minister, Major Burwash definitely established that the Jennie story is without foundation.

International Boundary

Important Work In Connection With Demarcation Of 5,000 Miles Of Border

In carrying out its duties of maintaining in a state of effective demarcation the 5,500 miles of international boundary between Canada and the United States, in accordance with the provisions of the Treaty of 1925, the International Boundary Commission, the Canadian section of which functions under the Bureau of Customs of the Department of the Interior, has at the point where an important international highway between Kelowna, B.C., and Portland, Oregon, crosses the boundary. It is also intended to locate and mark the boundary in the new Detroit-Windsor tunnel before it is officially open for traffic.

Out Of Luck

The husband came home and was greeted at the front door by his wife. "Did you get the new maid?" he asked.

She shook her head. "No, I'm afraid not, dear," she answered.

"Weren't there any at the registry office?" he went on angrily.

"Yes, darling, but we've had them all before," was the rejoinder.

UNDER CONTROL OR NO CONTROL?

UNDER CONTROL: With beer being sold by reputable licensed hotels under government supervision.

NO CONTROL: with bootleggers running rampant as in the old prohibition days.

Reasons why you should NOT sign the prohibition petition urging the government to abolish the sale of beer by the glass or bottle, thus doing away with the beer rooms, clubs and canteens.

1. The proposal to disturb the act comes from a small body of people whose social theories have not withstood the test of actual experience.
2. The Trades and Labor Congress are on record as being in favor of the sale of beer-by-the-glass.
3. By virtue of the local option provisions of the act, communities may extinguish a license when a majority of public opinion so expresses itself.
4. No license has been withdrawn as a result of a local option vote either in 1929 or 1930, though licenses attacked were at points where conditions appeared to the prohibitionists, as favorable to a dry result.
5. In a total of 58 local votes taken since the act came into force only four licenses have been cancelled as a result of votes; and these licenses were, in every case, adversely affected by peculiar local influence.
6. Absence of criticism at the last two provincial elections.
7. Hotel accommodation, particularly at country points, has improved as a direct result of the act, to a standard unequalled in any other province.
8. The general endorsement of the act by the travelling public and the willingness of the public generally to assist in enforcing the act by giving information regarding infractions and interdicting those needing protection from their own weakness.
9. Bootlegging and moonshining have been eliminated as remunerative pursuits. This, together with strict government control, has placed all intoxicating liquor beyond the reach of minors; fewer cases of intoxication in the police courts, in spite of a considerable increase in population. Leave the police of the province free to perform their natural functions, that of protecting the people, not taking up their time trying to enforce what has proved to be unenforceable legislation. Remember you cannot legislate men's minds, because they will never obey a law they do not respect. This was proven in prohibition days.
10. The operation of the act provides a large public revenue (4% cents of every 10c expended) this has helped to increase the general revenue of the province and prevent increased taxation. Formerly such revenue went to the bootleggers and moonshiners.
11. Official reports commend the act as eminently practical. They contain no important criticism of the act's clauses. Police reports indicate a continuous improvement in the general state of law and order.
12. The real motive prompting the petition is to render the act unworkable by eliminating the retail sale of beer-by-the-glass or bottle; the ultimate aim being a return to total prohibition.

If the beer rooms and clubs are abolished what does the Prohibition Party suggest to take their place? Is it to be liquor for the wealthy and prohibition for the worker?

The Moderation League of Alberta

INDIGESTION

Banished by Kruschen

"I suffered for some years from a bad stomach. I used to feel very miserable after meals. The doctor advised me to take Kruschen. I did it and I am now well. I decided to try Kruschen and am now well. I have done for the past 12 months, and I am very glad to tell you that my stomach is now in perfect order. I feel as if I am in spirit as I was 20 years ago, thanks to Kruschen." (W.H.)

You know how badly an engine runs when it gets clogged up. It is the same with your body when you suffer from indigestion. It is a matter of fact. What you need is a tonic—Nature's own tonic—Nature's alkaline salts.

You get all these alkaline salts in Kruschen. The first effect of these salts is to promote the flow of the saliva and to awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again, in the intestinal tract, certain of these salts promote a further flow of the vital juices which deal with partly digested food and prepare it finally for absorption into the system.

WORLD HAPPENINGS BRIEFLY TOLD

Bound for Germany to negotiate a settlement for accounts outstanding between that country and Canada, Hon. C. H. Cahan, Secretary of State, sailed recently from Montreal.

The London Daily Herald reported that King George recently visited to confer a title upon Bernard Shaw in recognition of his literary eminence, but that Shaw had declined.

Prince Leopold, of Bavaria, field marshal of Germany and commander of the German army in the east during the earlier stages of the war, is dead. He was 84 years old. Death was caused by pneumonia.

The first woman accountant in the province of Quebec was received into the membership of the Society of Chartered Accountants, when Miss Charlotte M. Howell was presented with her entrance certificate.

Crime in Great Britain has deteriorated so much that prisons are operated far below capacity and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool.

Order-in-council granting a loan of \$50,000 to the Manitoba Cattle Loan Association was passed by Manitoba's cabinet council. The association secured the money at five per cent, and will charge members a rate of interest for advances secured by lien notes on cattle purchased.

The parliament of New Zealand has approved a scheme to establish a national art museum to include a vermin and a carillon. The citizens of Wellington have subscribed \$500,000, and the government has granted a subsidy of the same amount.

Frederick Edin Smith, the first Earl of Birkenhead, statesman, 58 years old, died in London, England, Sept. 20, following a lengthy illness. He was at one time British Lord High Chancellor and Secretary of State for India. During the war he was prosecuted by Roger Casement, Irish leader, who was hanged for his wartime activities.

Shipping in Sweden

Sweden maintains lead in industry Among Scandinavian Countries Sweden maintains its lead in the shipbuilding industry among the Scandinavian countries, according to the latest reports. At the Swedish yards 26 vessels with an aggregate tonnage of 127,000 gross tons were in the course of construction at the end of the first half-year. Denmark comes second with 20 ships of 60,000 gross tons and Norway third with 33 ships of 40,000 gross tons. Of the ships at present being built in Sweden nine are steamers or motor ships, 2,000 gross tons each, two motorships of 2,000 to 4,000 tons, four motorships of 5,000 to 6,000 tons, and six motorships of 8,000 to 10,000 tons.

Shortest Name For Horse

Racer In England Answers To Name Of "O"

There's a race horse in England named "O." This establishes a practically unassailable record for brevity. One suspects that its owner, Mrs. G. L. Redmond, an American, saw an opportunity to attract a little attention by thus naming the race, although with so many horses running around these days owners have just about run out of names.

In the United States, there is a rule that a period of 10 years must elapse before a name can be used by a race horse can be used again. Over in England the only restrictions are that you cannot name your horse after the winner of one of the "classes" nor for a living person without obtaining permission.

The "classes" are five in number, although the term is frequently abused, as the Thoroughbred and Two Thousand Guineas, the Derby, Oaks and St. Leger. Horses winning these races retain their individual names in perpetuity.

DELIGHTFUL WEAR

All Tingley models are created and sketched in Paris and the patterns are made in New York. If small daughter is waiting some long-sleeved little dresses for the summer, then this is a charming model. If long sleeves are not in fashion, then this model is equally suitable because the lower sleeve can be omitted and they Presto!—short sleeves! Very pretty is this dress carried out as the sketch in a fine kasha weave in challs or some similar thin woven or wool and cotton. The original in nearest kasha has yellow and blue blanket stitch (crochet) on the edge, sleeve joins, and cross slits for arm decorations here and there. Owing to its color and trim the short sleeved form in cottons and washings suits. This pattern may be obtained in size 2 to 8. It is ready for immediate delivery, it is in hand cut. Send 50 cents (in stamps or cash) to Fashion Bureau. Write carefully, plain your name and full address, the number of the pattern and the size you want.

MAJOR L. T. BURWASH

Major L. T. Burwash, noted Canadian explorer, who is back at Ottawa after his epic Arctic flight, during which he mapped the magnetic pole and discovered much to clear up the mystery of the fate of Franklin's expedition.

Use Of Platinum Suggested For Coinage

But South African Government Fights It

The decline in prices has affected even such rare and costly commodities as diamonds and platinum. The government of South Africa has sought to limit production in the diamond fields between the Orange and Vaal Rivers so as to stabilize the diamond market, but platinum is produced in such widely separated areas that any centralized control over output appears to be impracticable. As a substitute for regulated production Dr. George F. Kunz proposed in an article appearing in the Mineral Industry that a new demand for platinum be created by the government's use of it for coinage.

Platinum money is not wholly an innovation, as Russia experimented with its coins many years ago. But the interesting thing about this proposal is its resemblance to the demand in this country in the eighties and nineties of the last century for the unlimited coinage of silver for the same purpose—namely, the stabilization of the price of the metal. The scheme in effect would be a new form of bimetalism. The experience of the United States and Europe during the last century proved conclusively that bimetalism is possible only in theory, as any change in the relative value of the two metals which are supposed to circulate concurrently would drive the dearer metal out of circulation.

If a platinum coin became worth more as metal than as its face value, it would cease to circulate and be used in the arts; if its place value exceeded the value of its metallic content, platinum that would ordinarily be used in the arts would be rushed to the mints instead, and it would tend to be displaced from circulation. This would prove disturbing to business in many ways, the gold standard is far from perfect, but it is the most satisfactory monetary system yet devised. It produces complications enough without the injection of something that would be a new metal. And if our people object to the use of gold coin they will object still more to platinum, which, weight for weight, is worth two and a half times as much as gold and is likely also to be confused with silver.

Conduct Mass On Eiffel Tower

A religious mass was said at the top of the great Eiffel Tower recently, the first time since it was built more than 40 years ago. It took place in the lofty wind-swept little cage 4,000 feet above the earth. A small table was used as an altar and the music which accompanied the service was the breeze. Special tribute was paid to M. Eiffel.

Made It Balance

The wife had been put on the budget plan. At the end of each month she and her husband would go over the accounts together. Every once in a while he would find an item, "L.O.E.—86."

Finally he said, "My dear, what is this—L.O.E. K?"

"Lord Only Known," she replied.

Mending clothes is accomplished in the same manner as patching an automobile tire, with a mending paste, which withstands washing, boiling and ironing.

A chicken jerks its head when running in order that it may see better, scientists of Johns Hopkins University declare.

A woman's tongue is her sword—and she never allows it to rust.

Tea Biscuits unusually good when made with Magic Baking Powder

3 out of every 4 Canadian housewives* who bake at home, use Magic Baking Powder because they find that Magic gives consistently better baking results.

Next time you bake biscuits, try Magic and see for yourself how well it will help you with your baking.

Try this Recipe for Biscuits

2 cups flour, 1/2 cup Magic Baking Powder, 1/2 cup shortening, 1/2 cup milk, 1/2 cup sugar, 1/2 cup salt.

Mix flour and salt together, then add baking powder and salt, then mix with sugar. Gradually add milk and mix until you have a soft dough as can be handled, using a knife to mix.

Roll dough on floured surface, then drop by spoonfuls on a greased and well-washed tin, or on a flat surface, and bake in a hot oven, 15 to 20 minutes.

These biscuits should be sold. Handle as little as possible and avoid washing to more than once with a clean cloth.

This fact was verified by a recent Dominion-wide investigation.

Huge New Glacier Found

Ice Field in British Columbia May Be Largest in World

Bringing back a story of having discovered an ice field that will out-rival any previously known, Christian Haasler and Ernest Feuz, Swiss guides of the Chateau Lake Louise and Banff Springs Hotel, arrived at Golden, B.C., by using train, motor and pack trail.

With Major Longstaffe, of Vancouver, the guides reached the headwaters of the South Gate Littlewood and Toke Rivers, 160 miles north of Vancouver, in the Cascade range. The silty state of the rivers convinced the explorers that the streams were glacial fed and so they penetrated the virgin country at the headwaters.

Huge snow fields and glaciers estimated at an area of 500 square miles, were seen and photographed for the first time. Ernest Feuz states that what they saw is only a part of the huge glacial field there.

Second Andre Diary "Causing Experts Much Difficulty"

Experts examining the documents found with the remains of members of the Andrea balloon expedition in toy Hivovon are having difficulty with the second of the Andre diaries, which they believe contain the record of the last days of the trip.

It had been exposed during the 33 years since the death of the three men and its contents are well known by time and the elements. "If you haven't a visitor," said the tourist at the hotel in, "what happens when anyone is taken seriously ill?"

"Oh, they just die a natural death."

Another Wonder Of Science

New Device Makes Wreath a Kind Of Third Hand

As we have caused breath at the marvels of science, it is not surprising to learn that inventors have found new uses for the breath of the human body besides just breathing, or blowing on one's hands when cold, or on a cup of tea when hot—assuming one is not taking tea when "company" is present.

Dr. M. E. Free, New York, consulting engineer and scientist, comes forward with a device which can be attached to many things, and all one has to do is to blow into a sort of telephone mouthpiece, and it will do a job of work. It makes the breath a kind of third hand when a person is busy.

For instance, if you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If typing, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slip back. If you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If typing, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slip back. If you are playing the piano, simply blow into the mouthpiece and it will turn a page of music. If typing, you don't need to lift your hand to shift the carriage, simply blow and the carriage will slip back.

Believe It Or Not

Mountain peaks in the Cariboo range are growing taller, according to air traders at Fairbanks, Alaska. As proof, one trapper points out that he has found trees on mountain sides with high water marks on them. The trapper says that the water marks are the result of a government geological party has been asked to investigate the growth of the peaks.

Saving For The People

Says Saskatchewan May Save Over \$300,000 In Connection With Freight Rates On Canned Goods

"People of Saskatchewan will save over \$300,000 this year on canned goods," states Hon. J. A. Merkle, Minister of Railways and Labor. The figure \$300,000 had been given to the department as the estimate of a large wholesale grocery firm with a warehouse in Regina, he said.

The estimate will be very close to correct," Mr. Merkle said. The rates in effect would continue until the close of navigation on the great lakes and then the matter "will have to be fought out all over again," he added.

"The government has received the support of the boards of trade of Saskatchewan, the Retail Merchants' Association, and the United Farmers of Canada in the fight, which had been won on July 14 and September 16, Mr. Merkle said in conclusion.

"The stables" are, we reminded, "do not applaud so heartily and unreservedly as the pit and gallery." No; they are the reserved seats.

In all Belgium there are only about 12,000 unemployed.
